

## 10-701/1H

## SPEC-SHEET

## 10-701/1H Polished Chrome Ball Parallel Outlet 1-1/2" OD

Ball fittings are used to construct handrails, footrails, stair rails, bar rails, ballet rails, and many other metal railing systems. The vertical posts of the railings should be made with a continuous architectural metal tube (for strength) while the horizontals are cut and fit with architectural hardware between posts. Ball fittings may be available in a variety of finishes not usually found in traditional brass fittings, including white, stainless steel, and more.

## Note:

All ball fittings are supplied with self-drilling, self-tapping hardware.
