

47-830/216 Internal Splice for 2" OD x 0.06" Tubing - 316 Grade Polished Stainless Steel

The 47-830/216 splice is an internal tube splice that is made of 316 grade stainless steel and fits almost entirely on the inside of a tube with the exception of a small center ring in the middle. This center ring has a polished finish to match the finish of the tube.

This item is designed to connect the ends of two tubes that are 2" round with a wall thickness of 0.06"

Use with stainless steel tube, item# 47-A121.

To ensure a stronger bond, apply adhesive item# LB-00201 and 00211 activator.
