

40-545/2 Polished Stainless Steel Floor Socket With Cap 2" OD

The 545 floor socket with cap is the fitting to use for removable railing and queueing posts. It is designed to hold 2" round tube and has a receiving space that is just over 2" in inside diameter to receive the tube. It is available in brass and 304 grade stainless steel and it mounted into the ground - typically core drilled into concrete. This item includes a cap to close the opening when there is no post in place.

Consult local building codes for rail height, wall offset and other requirements.

This flange is designed to be mounted to concrete floors.
