707/1	1"	2"	2 ½"
707/1H	1 ½"	2 ½"	2 ¾"
707/2	2"	3 ¼"	3 ¾"

Ball fittings are used to construct handrails, footrails, stair rails, bar rails, ballet rails, and many other metal railing systems. The vertical posts of the railings should be made with a continuous architectural metal tube (for strength) while the horizontals are cut and fit with architectural hardware between posts. Ball fittings may be available in a variety of finishes not usually found in traditional brass fittings, including white, stainless steel, and more.

Note:

All ball fittings are supplied with self-drilling, self-tapping hardware.
