

KK350-8 Eave Fitting Galvanized Steel 1-1/2" IPS (1.94" ID)

The Type 350 fitting has been designed for small structural building applications and provides for significant load rating. When used with the Type 351 ridge fitting a truss arrangement for additional support can be achieved. Double set screws are provided on the truss outlet to provide additional pull out resistance to hold structures firmly together.

Part	Weight	A	D	E	F	G	H	Hatch- Length
------	--------	---	---	---	---	---	---	------------------

350-8	2.62 lbs.	3.27 in.	1.65 in.	1.85 in.	2.64 in.	2.36 in.		2.62 in.
