

KK16-7 Clamp-on Tee Galvanized Steel 1-1/4" IPS (1.72" ID)

Widely used for adding to and modifying existing structures. This performs the same function as a KK10, but because of its open socket, it can be added to a complete structure. For alternative fitting, see KKA10. KK25 should be used when a join in the pipe is necessary.

Part	Weight	A	D
16-5	0.64 lbs.	5	1.97 in.
16-6	0.73 lbs.	6	2.05 in.
16-7	1.3 lbs.	7	2.68 in.
16-8	1.32 lbs.	8	2.87 in.
16-9	2.02 lbs.	9	3.54 in.
