

49-600/216 316 Satin (Brushed) Stainless Steel Flush End Cap 2" Tubing 16 Gauge.

The 49-600/216 flush end cap is made of 316 grade stainless steel, has a brushed (satin) finish and provides a simple and smooth, flush finish to the end of a tube.

Use with matching stainless steel tube, item# 49-A121. Place the neck of the end cap inside the tube and fasten into place using item LB-00201 with item 00211.

Flush end caps can be used at the end of a handrail, on the top of a railing post and at the end for bar foot rails.

Note: this end cap is designed to have a neck that fits INSIDE tube, not over it.

Consult local building codes for rail height, wall offset, railing termination and other requirements.
