

GT126 Quick Release Pipe and Tubing Cutter (1/4" up to 2-5/8")

The GT126 Super Heavy-duty Tubing Cutter can slice through copper, aluminum, brass and thin-wall tubing and stainless steel.

It is designed to cut tubing from 1/4" up to 2-5/8" diameter.

Four wide, hardened, flared, grooved rollovers allow cuts close to a flared end to avoid tube replacement in existing installations.

Full-size removable machinists reamer with two cutting edges for deburring pipe

Large fluted knob increases applied torque

Quick open and close mechanism saves time

New contoured shape and comfort grip

Full-size wheel is made of bearing tool steel and replaceable

Storage space in handle for extra wheel
