Push-Lock® fittings are made of type 316 stainless steel, with the exception of internal components that are made of other types of stainless steel.

DESIGNED FOR USE WITH 1X19 L.H. STRAND ONLY

Easy to install

Push-Lock® Turnbuckles are typically used as a second tensioning device on longer runs. They are a combination of our Adjust-a-Body® tensioners and Push-Lock® Studs, and are available with whatever connecting end is necessary. Whether wood posts, metal posts, sleeved posts, or even concrete; level runs or stairs, the Push-Lock® Turnbuckle is our most universal fitting.
