KK316-8

SPEC-SHEET

KK316-8 Parapet Flange Galvanized Steel 1-1/2" IPS (1.94" ID)

A component designed to retrofit roof parapets that are an unsafe height. Rail anchor is angled 25 degrees from the vertical so that the building's visage is unaffected by the implemented railing. Two holes are located in the top mounting bracket for mounting directly into the parapet. The two set screws in the vertical socket give greater side-load stability to the angled upright.
