| 707/1H | 1 ½ | 2 ½" | 2 ¾" |
| 707/2 | 2" | 3 ¼" | 3 ⅜" |

Ball fittings are used to construct handrails, footrails, stair rails, bar rails, ballet rails, and many other metal railing systems. The vertical posts of the railings should be made with a continuous architectural metal tube (for strength) while the horizontals are cut and fit with architectural hardware between posts. Ball fittings may be available in a variety of finishes not usually found in traditional brass fittings, including white, stainless steel, and more.

Note:
All ball fittings are supplied with self-drilling, self-tapping hardware.
