SPEC-SHEET

22-SCGA02/1544 Universal Self Closing Safety Gate in Galvanized Steel

Spring-loaded self closing safety gates are considered the preferred solution to chains, bars or sliding tubes when protecting areas as they automatically close behind a person.

The self closing safety gates passed salt spray testing to ASTM B117-11-55 Neutral solution over 200 hours to assess the performance of coating to resist corrosion. Our gates were also abuse tested and the mechanism tested to over 50,000 open/close cycles.

This universal gate

* alleviates the need to measure, fits all openings up to 44 inches, and can be cut to size on site.

* comes fully assembled, only mounting required.

***** ***is Independently tested to OSHA and ANSI standards.***

* has a hot dipped galvanized steel construction with optional yellow powder coat finish.

* Kee Gate safety gates are CE accredited to the requirements of EN 1090
  Comply with Work at Height Regulations
  Comply with EN14122-3:2016
  Comply with test requirements of EN13374
  Compliant with OSHA 1010.28 and 1910.29 Fall Protection Standards
