CA102-SM/5

SPEC-SHEET

CA102-SM/5 5 FT Basic 1/8" Cable Rail Kit Assembly for Wood and Metal Posts

The CA102-SM/5 cable railing kit is designed to mount through metal posts and wood posts and comes with one cable and all associated hardware including

- 1/8" diameter 1×19 Type 316 stainless steel cable
- Stainless steel fittings for both ends of your cable run
  - One tensioning fitting attached to the cable
  - One non-tensioning fitting not attached to the cable
- All washers and fasteners
- Installation instructions

The kit comes with 5' of cable. You will cut the cables to their proper lengths on site.

When taking cable railing through a corner, do not bend the cable past 45^0 at any one time. If turning 90^0, a 2-step turn using a double corner post configuration is required.

Accessories, such as mounting tabs, cable cutters, and other installation aids and equipment are ordered separately. For coastal applications in a salt water environment, it is strongly recommended item# CAE-ZCleankIT is purchased along with any kits. While Type 316 stainless steel, the most corrosion and rust-resistant stainless steel available, is used almost exclusively in our hardware, it is stain-less steel, not stain-proof. If you're near the ocean, some maintenance will be required.

See installation instructions for details about hole sizes for posts and tools needed.
